THIS IS UNEVALUATED INFORMATION

1. Russian Air Force maneuvers were held at the airfield of Erfurt-Bindersleben during July and August 1949.
2. On 7 July 1949, "window" was dropped in the vicinity at approximately 1800 hours. It was not possible to secure a complete specimen as that which fell in the town was quickly collected by the police, although children were seen playing with strips. The specimen collected is 60 centimeters long; the tin-foil is exactly 2 centimeters wide and the paper backing which is double is 2½ centimeters wide giving an overlap of ½ centimeter on either side. The backings are of very thin oiled tissue paper, and are stuck to the tinfoil at one end only.
3. "Window" was again dropped on 19 August 1949, at approximately 1600 hours, but because of high winds and other difficulties it was not possible to get any.
